Professional Summary

Aspiring Data Analyst seeking an internship to apply analytical and problem-solving skills to real-world business problems and contribute to data-driven decision-making. B.Tech Computer Science and Engineering (Data Science) student with hands-on experience in Python, SQL, PostgreSQL, Pandas, and Power BI, skilled in data cleaning, EDA, data visualization, and deriving actionable insights. Proficient in developing data-driven and machine learning solutions using Python and Scikit-learn, with strong analytical thinking and programming skills.

Education

Vardhaman College of Engineering

2023–2027

B.Tech in Computer Science and Engineering (Data Science)

CGPA: 9.11 / 10

Relevant Coursework

Data Analytics, Database Management Systems, Statistics, Machine Learning, Data Visualization

Technical Skills

Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis

Analytical Skills: KPI Analysis, Data Interpretation, Pattern Identification, Business Insights **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Dashboard Development

Databases: PostgreSQL, MySQL

Machine Learning: Scikit-learn, Feature Engineering, Supervised Learning, Model Evaluation

Tools: Git, GitHub, Jupyter Notebook, Excel

Projects

Customer Shopping Behavior Analysis

Tech Stack: Python, Pandas, PostgreSQL, Power BI

- Analyzed customer shopping data to identify spending patterns, customer segments, product performance, and subscription behavior.
- Cleaned and explored transactional data using Python/Pandas and performed business-focused analysis using SQL.
- Built an interactive Power BI dashboard to visualize customer and sales KPIs and generate actionable business insights.

Zepto E-commerce Inventory Analysis

Tech Stack: PostgreSQL, SQL, Data Cleaning, EDA

- Analyzed Zepto inventory data to evaluate product pricing, discounts, stock availability, and revenue opportunities.
- Performed data cleaning and validation, including null checks, duplicate SKU analysis, invalid-price removal, and currency conversion.
- Used SQL aggregations, CASE, GROUP BY, HAVING, and calculated metrics to identify high-value products, category revenue, discount trends, and inventory efficiency.

Certifications

- Data Visualisation: Empowering Business with Effective Insights – Tata Group, Forage
